DEVELOPMENT EXPERIENCE

Vizion Advertising   **Apr 2019 - Present**
Freelance Web Developer   Brooklyn, NY

- Providing comprehensive web development solutions to a wide clientele across multiple industries, working as part of a cross-functional team.
- Developing in multiple libraries including HTML, CSS, and JavaScript and ensuring compatibility across all browsers, as well as mobile devices.
- Leading the development of new websites from scratch, while working to optimize existing websites.
- Representing the web team across various meetings with project managers and clients to establish goals and develop workflows, road maps, plans, and schedules.
- Communicating effectively with client teams throughout the project lifecycle to accurately identify and define project requirements.
- Translating functional client requests into actual deliverables to ensure each project is seamlessly optimized for individual client needs.
- Researching and designing tailored UI and UX features to maximize usability, make websites intuitive and easy to navigate, and create a seamless user journey.
- Optimizing various websites and increasing search engine ranking significantly, developing and coordinating highly effective Google Campaigns.
- Researching, running troubleshooting, and reporting field issues, enhancing system/user experience continuously.
- Demonstrating an ability to prioritize and assign resources effectively, strictly adhering to demanding project timelines.
